

IC22 - Common Eyelid Procedures

Dr.Shubha Jhavar [J31] - Aurangabad

Date	26-Oct-2018
Time	08:00-08:50
Hall	C

Frequently encountered lid problems in daily OPD, pose a challenge. Here, We would like to simplify and share our experience of Common Eyelid procedures like Ptosis, Ectropion, Entropion, Lid Tumors and Lid Reconstruction.

Ptosis

Ectropion

Entropion

Lid Tumors and Lid Reconstruction

IC75 - Pediatric Ophthalmology and Vision Software's OR Recent advances in Ophthalmology.

Dr.Deshpande Pradeep [D44] - AURANGABAD

Date	26-Oct-2018
Time	08:00-08:50
Hall	E

Novel Computerized Solutions for the Management of Amblyopia. Abstract : Visual acuity assessment at an earliest age and immediate management are the key factors for a quicker and better outcome in amblyopia. In the era of computers, the purpose is to explain the nature and utility of the novel computerized ways for the management of amblyopia. Many researchers have concluded about the utility of perceptual organization and gaming platform to improve the VA. In amblyopia, including the innovative idea of the presenter to treat the most reluctant astigmatic related amblyopia [MA] by A.A.V.Games.

Tips and tricks in Pediatric Ophthalmic Evaluation

Common Ocular problems in Premature Babies and childhood

Visual Acuity Assessment in Preverbal and Preprimary Children

Innovative Vision Software's for the management of Amblyopia

Novel Computerised Solutions for the Management of Amblyopia.

IC30 - EYE BANKING AND CORNEAL TRANSPLANTATION--BASIC TO ADVANCED

Dr.Pande Ranjana [P73] - Pune

Date	26-Oct-2018
Time	09:00-09:50
Hall	E

Corneal transplantation saves sight in corneally blind persons .It has evolved from the time tested PK to more finer Lamellar keratoplasties This course aims to guide you about various aspects of eye banking, Penetrating keratoplasty , Therapeutic keratoplasty, DALK and endothelial keratoplasty

Eye banking

: Dr.Maskati Quresh B

Optical keratoplasty

: Dr.Shubha Jhavar

Therapeutic keratoplasty

: Dr.Pande Ranjana

DALK

: Dr.Bang Manasi

Endothelial keratoplasty

: Dr.Bang Rohit

IC81 - Cataract in Complex Corneas

Dr.Pahuja Kishore [P64] - Pune

Date	26-Oct-2018
Time	10:00-10:50
Hall	C

The field of cataract surgery has seen a wave of advancements, with accurate intraocular power calculations and better IOL designs that fit the specific needs and desires of the individual patient. However, the IOL power calculations and surgery can be challenging in coexisting corneal co-morbidities like corneal scars, keratoconus, pellucid marginal degeneration, post refractive surgery and post keratoplasty. This course intends to address challenges posed before, during and after the cataract surgery in these complex corneas in an attempt to provide a better outcome

Biometry for complex cornea (Diagnostics and IOL power calculation)

Corneal customization for cataract surgery

Cataract surgery in ectatic cornea

Problem based learning (Cataract surgery post corneal transplant)

Doc, I need to be glass free AGAIN! (Cataract surgery post refractive surgery)

Opps! (Intraop complications and pearls to manage it)

: Dr.Pahuja Kishore

: Dr.Pahuja Natasha Kishore

: Dr.PARYANI MUKESH J

: Dr.Wagh Sangeeta

: Dr.Ladi Jeevan S

: Dr.Pahuja Kishore

IC2 - Special Challenges in the pediatric clinic

Dr.Charuta Maneesh Bapaye [B1823/15] - Nashik

Date	26-Oct-2018
Time	10:00-10:50
Hall	E

A child's eye is not a miniature adult eye. It reacts differently to pathologies. To prevent the long term sequelae of amblyopia, diagnosis and treatment of the pathology have to be timely and accurate. As patient co-operation is not guaranteed, expertise is a must. Amongst these, the first challenge is managing complicated strabismus like Duane's and Brown's syndrome, Monocular elevation deficit, paralytic and pattern strabismus. Pediatric cataracts are challenging both surgically and in their post-op management. Ocular surface and corneal diseases like Vernal Catarrh, SJS, chemical burns, keratoconus and ulcers pose a challenge. Pediatric glaucoma is a challenge too. Oculoplasty conditions like congenital ptosis, epiblepharon, dermoids also need to be managed in this age group. Pediatric ocular trauma is common and needs expertise in management. In this IC we attempt to present a simplified approach to efficiently managing the special challenges that we face in a pediatric clinic.

Complicated Strabismus in children

Managing Pediatric Cataracts

Managing the pediatric cornea and ocular surface

Pearls for Pediatric Glaucoma

Pediatric Trauma Management

Oculoplasty in children

: Dr.Charuta Maneesh Bapaye

: Dr.Rishikesh Mayee

: Dr.Mehta Hijab

: Dr.Hoshing Gayatri

: Dr.Bapaye Maneesh

: Dr.Dole Pallavi (Khedkar)

IC69 - Title -Keratoconus for general ophthalmologists

Date	26-Oct-2018
Time	11:00-11:50
Hall	C

Dr.Sambare Chitra [S146] - Pune

This course will focus on early detection and timely management of keratoconus . Suspicion of keratoconus , Early diagnosis by tomography and monitoring progression is the key for efficient management of this condition. Causes of keratoconus and role of ocular Allergy will be discussed . Crosslinking for arresting the progression and visual rehabilitation with contact lenses, lasers, intrastromal rings and ICL will be discussed and explained in the context of various cases. In advanced keratoconus , DALK and penetrating keratoplasty still remain the gold standard of management . All these options will be discussed along with their advantages and disadvantages. After Attending the course , general ophthalmologists will have a better understanding of this condition , will know the importance of early detection and when to proceed with non surgical modalities and when to intervene surgically.

Suspect and you will find – Early diagnosis and progression of KC

Ocular allergy and keratoconus

Can I fit contact lenses in KC ?

Do any medicines work? Non surgical management, crosslinking and lasers

Implantable contact Lens in KC – is it a good option?

Intrastromal rings – How do they work?

DALK and PK still gold standard for advanced KC

: Dr.Pahuja Natasha Kishore

: Dr.Pranav More

: Dr.Kharat Meena

: Dr.PARYANI MUKESH J

: Dr.Bang Rohit

: Dr.Agarwal Vinay B

: Dr.Sambare Chitra

IC4 - A to Z of eye lid disorders

Dr.Ramesh Murthy [M126] - Pune

Date	26-Oct-2018
Time	11:00-11:50
Hall	E

This course is intended for the general ophthalmologist, post graduates and the oculoplasty specialists. This course will cover the entire gamut of eye lid disorders from simple lid malpositions like entropion, ectropion to more complex problems like lid reconstructions and lid tumors. Emphasis will be on showing pictures of cases and surgical videos. The audience will be shown simple and practical steps of medical and surgical management which can be easily adapted into routine clinical practice. The speakers are expert oculoplasty surgeons and have a wide experience in dealing with these conditions. Overall this will be an enriching learning experience.

Lid anatomy - unique tips

Entropion and ectropion

Lid tumors

Trichiasis and distichiasis

Lid infections and blepharitis

Lid reconstructions

: Dr.Gupta Himika

: Dr.Ramesh Murthy

: Dr.Desai Savari

: Dr.Gupta Himika

: Dr.Pande Arundhati

: Dr.Ramesh Murthy

IC20 - IOL implantation in inadequate capsular support

Dr.Ladi Jeevan S [L3] - Pune

Date	26-Oct-2018
Time	12:00-12:50
Hall	C

This course gives detail information regarding different types of IOLs used in cases of inadequate capsular support. In case of inadequate capsular support during cataract surgery surgeon may have to use different methods of IOL fixation or differ IOL implantation to secondary stage. There are various methods, pros and cons of each will be discussed. The types are - Anterior chamber IOL, Glued IOL, Yamane's Technique, Sutured Scleral fixation, Iris claw and Iris Fixated IOLs. The course will describe each technique with videos. There will be panel discussion at the end to benefit all delegates.

IOL Exchange and Anterior Chamber IOL

Vertical Glued IOL under topical

Yamane's Technique

Iris Claw IOL

Sutured Scleral Fixation IOL

: Dr.HALDIPURKAR SUHAS S

: Dr.Ladi Jeevan S

: Dr.Labhsetwar Nikhil

: Dr.Patil Sharad R

: Dr.Medha Nitin Prabhudesai

IC7 - Internal limiting membrane -tips on macular surgery for beginners

Dr.Bidaye Shashank V [B1994/16] - Nagpur

Date	26-Oct-2018
Time	12:00-12:50
Hall	E

This course will outline principles of macular surgery, management of complications and approach to extended indications for ILM peel other than macular hole. A practical and interactive way of ILM peel with interesting videos in interactive ways will be discussed. Topics will cover special instrumentations, imaging techniques, vital dyes, techniques of ILM peel and tips for avoiding complications will be discussed. Active audience participations with panel discussion of various techniques with complication with help of videos will be discussed.

Instrumentation for ILM peeling, imaging modality

Vital dyes for ilm peel

ILM peeling technique in macular hole

ILM peeling in non-macular hole case

Tips n tricks for avoiding complication

: Dr.Ravi Dekate

: Dr.Sonawane Suhas

: Dr.Bidaye Shashank V

: Dr.CHADDA GARIMA

: Dr.RAKESH SHAH D

IC8 - COMMUNICATION SKILLS

Dr.Malik Sunaina [M7] - Aurangabad

Date	26-Oct-2018
Time	13:00-13:50
Hall	A

This subject though extremely relevant, finds no place in our medical college curriculum. We feel that it is very important , not only for residents, but also for consultants, to know this. this course is designed to give attending delegates tips on

How to make a good powerpoint presentation

How to make a good video presentation

How to be an effective speaker

How to research & Prepare a good paper for publication

: Dr.Vare Archana A

: Dr.Thakre Snehal R

: Dr.Malik Sunaina

: Dr.Nayak Barun Kumar

IC29 - Smartphones in Ophthalmology - LIMITLESS POTENTIAL

Dr.Ahuja Ashish [A-1492/13] - Mumbai

Date	26-Oct-2018
Time	13:00-13:50
Hall	C

The applications and utility of smartphones in the field of ophthalmology have been evolving constantly over the last few years. The recent advances in smartphone technology and software upgrades have tremendously increased their potential in our field. This instruction course brings together a group of young ophthalmologists, each of whom have good experience in using smartphones for different applications in ophthalmology. We will discuss smartphone based fundus, slit lamp and surgical microscope based photography of the eye , phone based apps to assist ophthalmologist , Artificial intelligence , augmented reality and 3D printing technology . At the end of this course, the audience would not only have a comprehensive overview on the various current uses of smartphones in ophthalmology, but also learn about the exciting future prospects.

SMARTPHONE BASED SLIT LAMP IMAGING AND VARIOUS ADAPTERS TO ASSIST

: Dr.Modi Rohit

SMARTPHONE BASED FUNDUS PHOTOGRAPHY -AN INTRODUCTION

: Dr.Zain Irfan Khatib

SMARTPHONE BASED IMAGING FOR EARLY RETINOBLASTOMA DETECTION

: Dr.Amit Khedekar

SMARTPHONE BASED APPLICATIONS FOR OPHTHALMOLOGIST

: Dr.Gaurav Y Shah

FUTURE TECHNOLOGY AND POTENTIAL USE OF SMARTPHONES

: Dr.Ahuja Ashish

IC25 - Strabismus simplified

Dr.Dhamankar Tanmayi [D1865/15] - Pune

Date	26-Oct-2018
Time	13:00-13:50
Hall	E

Do you feel like running away every time you see a squint patient? Then run to this session! It's a case-based and simplified approach to evaluation and management of the commonly encountered squints in general practice like simple esotropia and exotropia, along with some special forms like Duane's syndrome, Brown syndrome, MED. The course will give the general ophthalmologist an overview on how to approach and manage a squint patient and some complications of strabismus surgery. Designed for PG students, optometrists, General ophthalmologists and Strabismologists, this session promises to be a very interesting and enriching learning experience , with audience interaction and panel discussion by experts. Overcome your fear of squint with 'Strabismus Simplified'!

Basic evaluation in strabismus

Evaluation and management of common types of Esotropia

Evaluation and management of common types of Exotropia

A General Ophthalmologist's approach to squint

Special forms of strabismus (Duane's, Brown's, MED etc)

Complications in squint surgery

: Dr.Ramesh Murthy

: Dr.Dhamankar Tanmayi

: Dr.Rishikeshi Nikhil

: Dr.Shah Kaushik Arvind

: Dr.Kanade Abha V

: Dr.Prasad Walimbe

IC3 - Medicolegal aspects in ophthalmology

Dr.Taswala Jignesh [T5] - Pune

Date	26-Oct-2018
Time	14:00-14:50
Hall	E

Medicolegal issues are on the rise in all fraternities. Eye being a very important & delicate organ, the patients expectations are sky high. The overall awareness of diseases have increased many fold. Eye Surgeons are under tremendous stress to deliver nothing but the best in such a highly competitive environment. Mistakes do happen. Back biting by our colleagues add to already agitated patient & then litigation starts. So this instruction course gives a thorough idea of how to go about to handle such scenarios. Senior & leading Ophthalmologist & experts in this field are going to guide the esteemed audience in this matter. Awareness of various laws governing medicolegal cases. How to handle a rival colleague. How to handle an problematic patient. The press is never doctor friendly. So tips to handle press in the event of a medicolegal cases. This & much more will be covered in this truly enlightening course

Reporting a problematic patient

: Dr.Taswala Jignesh

What do in case of threat from press/political group/unruly patient

: Dr.Dixit Udayan

The paradigm shifts in medicolegal cases in India

: Dr.Paranjpe Mandar

What to do if charged with medical negligence case

: Dr.Mishra Indeevar

The laws governing medical fraternity of India

: Dr.Deshpande AA

How to handle a colleague posing as rival

: Dr.Rasal Sanjay A

What precautions to take to avoid litigations

: Dr.JOSHI RAJESH S

IC73 - DEMYSTIFYING MULTIFOCAL IOL

Dr.Atul Kadhane [K110] - Amravati

Date	26-Oct-2018
Time	15:00-15:50
Hall	C

Cataract surgery now a days becomes refractive cataract surgery.patients are now interested in lifestyle.Gone are the days when patients wants to see better than they see with cataract.Now patients wants to see better than they see before they develop cataract. They wants 6/6 N6 postop. Multifocal iol is technological advancement to fulfill there expectation.Even this can be a lens based presbyopia correction tool for the huge population of presbyopia.In this course we covered all aspect regarding multifocal iol starting from patient selection to giving perfection in result.this will help in boosting the confidence of surgeon and will take their practice to next level

Patient selection and work up

Option unlimited indian,imported,multinational... which one to choose

Trifocal iol

EDOF IOL role in current cataract practice

Monovision... good alternative

Managing unhappy patients after multifocal iol

: Dr.Pahuja Kishore

: Dr.Atul Kadhane

: Dr.HEROOR ANAGHA A

: Dr.Pahuja Kishore

: Dr.Atul Kadhane

: Dr.HEROOR ANAGHA A

IC84 - TACKLING DILEMMAS IN REFRACTIVE SURGERY- CASE TO CASE!

Dr.Srivatsa Purnima R [S1715/14] - Pune

Date	26-Oct-2018
Time	15:00-16:00
Hall	D

Objective of this course will be to deal with dilemmas in refractive surgery which even experienced surgeon faces from case selection to preferred modality of surgery. Situations that often put refractive surgeons into dilemmas such as borderline topographies, extreme biometries, nystagmus and other challenging situations in refractive surgeries will be discussed . Visual rehabilitation in keratoconus and the step by step approach of a surgeon in managing these situations will be covered . The course will end with simplifying the postoperative protocols for different refractive surgeries and modifying them in special scenarios.

Refractive Screening & Diagnostic Dilemmas - making Topos work for you!

Excimer Laser Refractive Surgery: Expanding Horizons in challenging situations!

SMILE in special situations

Rejected but not dejected: Managing Lasik

Topographic and biometric dilemmas in decision making

Managing interesting case scenarios in lasik surgery

Visual rehabilitation in Corneal Ectasias

Simplifying postoperative protocols in all types of refractive surgeries

: Dr.Srivatsa Purnima R

: Dr.Darak Ambarish Balkrishna

: Dr.Vardhaman Kankaria

: Dr.Pahuja Kishore

: Dr.PARYANI MUKESH J

: Dr.Darak Ambarish Balkrishna

: Dr.Bhagali Ridhima

: Dr.Pahuja Natasha Kishore

IC68 - OCULAR TRAUMA MANAGEMENT – Common clinical situations

Dr.Shah Sushmita G [S133] - Mumbai

Date	26-Oct-2018
Time	15:00-15:50
Hall	E

Ocular trauma is an emergency which every clinical practitioner has to manage. They could be simple and innocuous with excellent prognosis or could be devastating leading to visual impairment or blindness. This instruction course deals with the various nuances of ocular trauma ranging from management of acute chemical injuries, corneal tears and foreign bodies, traumatic cataract and iris tears as well as posterior segment trauma. Experienced faculty will discuss in detail regarding the above clinical situations along with clinical and surgical videos and will be followed by adequate interaction with audience.

Introduction to IC and speakers

: Dr.Shah Sushmita G

Classification of Ocular trauma

: Dr.Shah Sushmita G

Management of acute chemical injuries

: Dr.Purvasha Narang

Management of Corneal tears and foreign body

: Dr.Kavita

Management of Traumatic cataract, iridodialysis and pupilloplasty techniques

: Dr.Shah Sushmita G

Management of Posterior segment trauma

: Dr.Lahiri Karobi C

IC31 - To Unravel the mystery of Uveitis

Dr.Modi Rohit [M1868/15] - Mumbai

Date	26-Oct-2018
Time	16:00-16:50
Hall	C

Prevalence of Uveitis is approximately 467/100,000 of the general population. Even in retina practice, patients presenting with uveitis form a major component. A step wise approach towards diagnosis and management of various types of uveitis can unravel the mystery which uveitis poses for many. The Course will cover following topics: Case Based Approach to Anterior Uveitis HLA B27: How to interpret it? Case based Approach to Posterior Uveitis Ocular Tuberculosis: Myths and Facts How interpret Investigations in uveitis Immunosuppressants: Is it My cup of tea

Case Based Approach to Anterior Uveitis

: Dr.Modi Rohit

HLA B 27:How to Interpret?

: Dr.Modi Rohit

Case Based Approach to Posterior Uveitis

: Dr.Subramanyam Anand

Ocular TB : Myths and Facts

: Dr.Modi Rohit

How to Interpret Investigations in Uveitis?

: Dr.Gaurav Y Shah

Immuno Supressants: Is It my cup of tea?

: Dr.Moreker Mayur R

IC42 - Cornea - All about basics

Dr.Lahane Sumeet Tatyrao [L1796/14] - Mumbai

Date	26-Oct-2018
Time	16:00-16:50
Hall	D

Cornea though forms only 1/6 th of outer coat of eye is most important structure in visual apparatus . It's myriad of various diseases from dystrophy , infections , inflammation to tumours . Avascular nature of cornea not only makes its transplant much accepted but also allows procedures like refractive surgery , implantation of corneal rings , inlays to treat refractive error and ectasia respectively .With advent of technology we are able to understand corneal strcture more precisely and now there are various modalities available to image cornea upto the resolution of 10 microns and surface irregularities This course will cover basics of corneal lesion from infections to dystrophy , imaging (topography , confocal , slit lamp photography) and their interpretation with treatment in brief which is very important clinically and also PG exam point of view

How do I document what I see ?

Corneal ulcers - all that you need know

Imaging and interpretation

Corneal trauma -management

ETC of cornea - Ectasia ,Dystrophy ,Tumours

: Dr.Lahane Sumeet Tatyrao

: Dr.Pradhan Aditya

: Dr.Gaikwad Ganesh Govardhan

: Dr.Kalyanshetti Ganesh

: Dr.Lahane Sumeet Tatyrao

IC54 - Phaco complication -its recognition,prevention and management for the learner and learned.

Date	26-Oct-2018
Time	16:00-16:50
Hall	E

Dr.Sonawane Suhas [S113] - Dhule

instruction course deals with genesis ,management and prevention of different problems of complications that have occurred during different stages of phaco procedure like run away capsulorhexis, torn ccc, it demonstrate management of intraoperative miosis ,and iris prolapse, its also shows posterior capsular tear that occurs during various stages of phaco surgery and its management,.This course also shows management of zonular dialysis, it demonstrate when and how to convert into more safer sics in a problem situation when continuation of phaco is risky.it covers how to perform good ant vitrectomy ant segment surgeon.

introduction

: Dr.Sonawane Suhas

ANTERIOR CAPSULORHEXIS COMPLICATIONS DURING PHACO

: Dr.Bang Rohit

Management of intraoperative miosis,irris prolapse and ifis

: Dr.Patel Jenin

Posterior capsule rent during phaco

: Dr.Sonawane Suhas

Zonular dialysis during nucleus removal and cortex removal and its management

: Dr.Sonawane Suhas

HOW TO PERFORM GOOD ANT VITRECTOMY

: Dr.RAMCHANDANI SURESH J S

IC11 - Using Glaucoma diagnostics optimally

Dr.DHAMANKAR RITA R [D32] - Raigad

Date	27-Oct-2018
Time	08:00-08:50
Hall	B

With the advent of newer diagnostic modalities, a general ophthalmologist has to learn to optimally use these, to help him get to the correct diagnosis, in glaucoma. Interpretation is just one aspect, when to order a specific test, what all to look for, what are the red flags, how best you can use some of these tests as a stand alone test, or in a combination to help you in delivering the best to your patient; is something you will take home from this IC. We will be dealing with actual case presentations of Pre perimetric glaucoma, angle closure Glaucoma, Moderate POAG, Advanced POAG & then see which tests need to be done, how to correctly interpret them, look at the variations, normal & abnormal & finally wrap up with a very strong take home message, talking about how best to identify progression in any Glaucoma patient. All that you need to know is right here, ordering a test, interpreting it, or the most appropriate test in a given case. Glaucoma, the patient is yours forever!

Introduction to the IC

Case presentation Preperimetric Glaucoma, Moderate POAG, Advanced POAG, Angle closure Glaucoma

Perimetry which program for confirming POAG, PACG,

When will you use a 10-2 / Macular program / Size 5 in Glaucoma diagnostics

OCT, how best can it be used in Glaucoma diagnostics

Gonioscopy /AS OCT / UBM , what will you use to diagnose Angle closure, when?

How will you monitor Progression in Glaucoma

: Dr.DHAMANKAR RITA R

: Dr.DHAMANKAR RITA R

: Dr.Kamdar Priti

: Dr.Nerlikar Roopali

: Dr.Hazari Ajit

: Dr.Deshpande Nitin S

: Dr.VIJAY SHETTY

IC16 - Ophthalmology and beyond

Dr.Walimbe Tejaswini [W17] - Pune

Date	27-Oct-2018
Time	08:00-08:50
Hall	C

To achieve success in professional and personal life we need to think beyond ophthalmology. This instruction course will include important pearls about residency training, practice management and financial aspects of clinical practice. It also includes how to overcome barriers to achieve success, impact of social media on medial professionals and balancing all important areas of life.

Residency training in ophthalmolgy in India

Breaking the glass ceiling

Social media and medical profession

Basics of financial planning

Is medical profession loosing its respect in society ?

Inspiring positive change-my hobbies

: Dr.Parikshit Gogate

: Dr.Malik Sunaina

: Dr.Walimbe Tejaswini

: Dr.Paranjpe Mandar

: Dr.Sharma Geetanjali P. Mrs

: Dr.Prasad Walimbe

IC14 - A comprehensive and practical guide to PCR management

Dr.Jain Suvira [J1818/15] - Mumbai

Date	27-Oct-2018
Time	08:00-09:00
Hall	D

We've been told to expect the unexpected in Cataract surgery and yet when the posterior capsule ruptures with the vitreous gel mixing with the cortical matter and the nucleus fragments do their disappearing act, our hearts begin to sink and our minds get shocked into a stand still state of inertia. This is only because many of us are not equipped with the knowledge of how to take it forward from here. We are in unfamiliar territory. This IC will discuss threadbare outline the etiological factors, look at the subtle warning signs of impending or early pcr, damage control, the essentials of setting up the vitrector, help in formulating an appropriate strategy and finally offers pearls in the surgical treatment modalities. It's as comprehensive as its basic.

How and why - Etiology of PCR The first 2 minutes after ... damage control

: Dr.Jain Suvira

Setting up of the Anterior vitrectomy unit Anterior vitrectomy demystified

: Dr.Jain Suvira

Improvisation in Vitrectomy - Pars Plana anterior vitrectomy

: Dr.Jain Suvira

Suggestions and tips to IOL implantation in PCR High Risk Situations : Polar Cataract, Traumatic

: Dr.Jain Suvira

IC63 - Understanding and Optimizing poor visual outcomes in post cataract surgery.

Date	27-Oct-2018
Time	08:00-08:50
Hall	E

Dr.Patel Jenin [Temp001] - Mumbai

In spite of a perfect Cataract Surgery and achieving emmetropia (6/6) many patients are still unhappy with quality of vision, yet others have refractive surprise and hence end up with sub optimal results due to various factors .Pre- operative evaluation and diagnostic (role topography ,tear break up time ,oct) are extremely crucial .Biometry plays an crucial role to achieve emmetropia. In order to meet heightened patient expectations, it is crucial to pay utmost attention to patient selection, accurate keratometry and biometry readings, as well as to the application of correct IOL power formula with optimized lens constants The course also deals with the diagnostic (topography,tear break up time ,oct) ,medical ,surgical management(laser refractive ,iol exchange ,piggy bag iol) for these patients This video based course is problem based and case based .

Role of Topography and other diagnostics in patient pre-operative evaluation

Optimizing IOL power calculation and out comes--- (Assessing K, Biometry)

Refractive Lasik Procedure for Refractive surprise

Practical approach to Fixing Residual Astigmatism and Refractive Error

Dealing with tricky situations and IOL selection

Unhappy Multifocals and emmetropes

: Dr.Vardhaman Kankaria

: Dr.Bhatt Deepak C

: Dr.Sonawane Suhas

: Dr.Patel Jenin

: Dr.Kumar Doctor J

: Dr.Agarwal Arti

IC15 - To treat or not to treat? That is the question!

Dr.Nerlikar Roopali [N21] - Pune

Date	27-Oct-2018
Time	09:00-09:50
Hall	B

With increasing trend of diagnostic test driven treatment of glaucoma especially "early" glaucoma, over treatment has become a reality. This course will cover the important guidelines for starting treatment in a newly diagnosed case with the relative weightage to be given to each factor. OHT, preperimetric glaucoma and NTG as well as early glaucoma situations will be discussed using case examples. Common errors to be avoided will be highlighted and summary of the most factors will be emphasized

Guidelines for diagnosis of glaucoma and it's treatment

Who not to treat

What qualifies as NTG and when to treat

What do we mean by preperimetric glaucoma and which of them need treatment

: Dr.Nerlikar Roopali

: Dr.Kamdar Priti

: Dr.DHAMANKAR RITA R

: Dr.Nerlikar Roopali

IC19 - Strabismus Spectrum

Dr.Shubhangi Sudhir Bhave [B32] - Nagpur

Date	27-Oct-2018
Time	09:00-09:50
Hall	C

Strabismus can present in varied and interesting ways and pose a challenge to an ophthalmologist in diagnosis and management. The present instruction course is aimed at case- based discussion on various aspects of strabismus. The instructors will present interesting cases and discuss clinical methods for diagnosis, investigations and further management of these cases. The audience will be able to plan decision-making in the important cases of strabismus.

Introduction

Managing accommodative esotropia

Large- angle squint- let's accept the challenge

Demystifying IV nerve palsy

Myasthenia gravis- the master mimicker

Managing Duane's retraction syndrome

: Dr.Shubhangi Sudhir Bhave

: Dr.TRUPTI KADAM-LAMBAT

: Dr.Shubhangi Sudhir Bhave

: Dr.Amol Anil Tamhane

: Dr.Rishikesh Mayee

: Dr.PANDE VARSHA B

IC23 - Pearls in Ocular and adnexal Trauma

Dr.Dhobekar Mangesh [D1176/09] - Jalna

Date	27-Oct-2018
Time	09:00-10:00
Hall	D

Though unfortunate, an ocular trauma is relatively a common condition encountered in our daily practice. So not only specialist but also general ophthalmologist must be updated with current ocular trauma management principles. This instruction course is designed to review the examination of common as well as uncommon ocular trauma conditions along with practically useful management tips and tricks in detail. At the end of this instruction course attending people will be more confident and comfortable for handling ocular trauma cases.

Eyelid and Canalicular Injuries

Management of Corneal Tears

Management of Scleral Tears and IOFB

Management of Traumatic Cataract

Management of Traumatic Glaucoma

Management of Orbital Trauma

Traumatic Optic Neuropathy

: Dr.Patil Jayesh

IC70 - Posterior capsular rent in cataract surgery.....a retinal surgeons perspective

Date	27-Oct-2018
Time	09:00-09:50
Hall	E

Dr.Vaidya Ashish R [V13] - Mumbai

Posterior capsular rent in cataract surgery is a significant though relatively rare complication with increased expertise and better machinery. however it is important to be able to manage it effectively and efficiently to give a good result.in this ic we shall be discussing the subtle nuances of managing PCR from a retinal surgeons perspective. this shall include the preoperative factors predisposing to pcr, the intraoperative management of pcr, the management of a dropped nuclear material ,the choice of iol to be inserted , and the post operative regimen for these patients. many of these patients are seen at some time by a retinal surgeon and at this time sometimes the retinal surgeon wishes they were managed in a different way . this course would illustrate how the retinal surgeons would like these patients to be treated and the medicolegal implications of the same.

Preoperative factors and techniques to prevent pcr

Anterior vitrectomy principles and techniques

Management of the dropped nucleus

IOL selection in pcr

Postoperative management of patients eye and expectations

Panel discussion including clinical scenarios of how to manage

: Dr.Agrawal Santosh Hanuman

: Dr.Malpani Anupam

: Dr.Vaidya Ashish R

: Dr.Subramanyam Anand

: Dr.Vaidya Ashish R

IC55 - Glares, Scares and Iris tears

Dr.Chipade Prakash [C1969/16] - Thane W

Date	27-Oct-2018
Time	10:00-10:50
Hall	C

This IC aims to dwell on challenges encountered in cataract surgery beyond the often discussed topic of nucleus management. 1. Stabilisation of capsular bag - in a weak zonular support, how to use devices like Ahmed segment, CTR, Cionni ring 2. Pupil expanders- tips and techniques for using different devices like Malyugin ring, B-Hex ring, Assia pupil expander 3. Pupilloplasty to avoid Glare- techniques such as Siepser knot, Purse string suture 4. Repairing of preexisting/iatrogenic iridodialysis for cosmesis- sewing machine technique, rail road technique 5. Aniridia iol - technique of Aniridia iol implantation

Split Wide Open

IC24 - MODIFICATIONS OF BASIC GLAUCOMA SURGERIES

Dr.Tagare Abhijit A [T1] - Kolhapur

Date	27-Oct-2018
Time	10:00-11:00
Hall	D

GLAUCOMA SURGERIES ARE WIDELY PERFORMED BUT THEY HAVE A FEW LIMITATIONS AND COMPLICATIONS. WE WILL PRESENT A FEW MODIFICATIONS OF COMMONLY DONE ANTI GLAUCOMA SURGERIES.

MODIFICATIONS IN TRABECULECTOMY

RELEASABLE SUTURES IN TRABECULECTOMY

OLOGEN IN TRABECULECTOMY

MODIFICATIONS OF AHMED GLAUCOMA VALVE SURGERY

: Dr.Walimbe Tejaswini

: Dr.Hoshing Gayatri

: Dr.BHOMAJ POOJA S

: Dr.Tagare Abhijit A

IC28 - Zepto Cataract Surgery in Premium lenses

Dr.KAPOOR RAJESH R [K1371/11] - NAVI MUMBAI

Date	27-Oct-2018
Time	10:00-10:50
Hall	E

Modern day Cataract surgery is Refractive surgery and Premium lenses are need of the day for perfect outcome. Standardised Surgical technique and Advanced Biometry is the soul for achieving perfect result. Effective lens position(EPL) is required in all Modern day IOL calculating formulae. EPL is largely dependant on Perfect and central capsulorhexis. The way to make perfect rhexis are Manual, Femtosecond laser and Zepto technology. Manual rhexis can go wrong in best of hands and more so in Hypermature cataract. Femto lasers are very costly and may not work in hypermature cataract, but Zepto technology is simple and works in all grades of cataracts , works very well in 2.2 mm incision, has less learning curve, is cheap, and above all works seamlessly in our present Operation theatre wihtout any modification. Many studies have proven that Zepto Rhexis is strongest among all types. In our setup it is very good tool for perfect outcome for a Refractive cataract surgeon.

Advance Biometry for Premium lenses

Zepto for beginners- is there any learning curve

Video Assisted- Zepto Multifocals and Toric Iols

Complications with Zepto Technologies

: Dr.RAMCHANDANI SURESH J S

: Dr.Gaitonde Dilip S

: Dr.KAPOOR RAJESH R

IC49 - DECISION MAKING FOR NON-SURGICAL AND SURGICAL MANAGEMENT OF STRABISMUS AND NYSTAGMUS

Date	27-Oct-2018
Time	11:00-11:50
Hall	C

Dr.Rishikeshi Nikhil [R1217/09] - Pune

More often than not, the oft-heard idiom " LOVE AT FIRST SIGHT " totally fails when an eye surgeon has the first encounter { mostly unromantic } with a case of Strabismus/ Nystagmus. But as one courts and understands the beauty of the subject with all its logical progressions and realistic surgical projections, the same surgeon cant help but fall head over heels for this wondrous subject!! This Instruction course has been expressly designed to help surgeons to understand the simplicity and the complexity of the management of eye movement disorders and for the strabismologist to have a beautiful interaction on the subject. The audience will be taken through the goals of management in general, to individual conditions like horizontal concomitant deviations, nerve palsies , special conditions like Duane's, Brown's , Monocular Elevation Deficiency, and Nystagmus Management. The talks will have numerous pictures and videos and will stress more upon practical aspects rather than the theory!

BASIC PRINCIPLES OF MANAGEMENT OF STRABISMUS
CONCOMITANT STRABISMUS
NERVE PALSIES (3rd, 4th, 6th)
SPECIAL CONDITIONS - DUANE'S, BROWN'S, MED etc
NYSTAGMUS

: Dr.Rishikeshi Nikhil
: Dr.Parikshit Gogate
: Dr.Ramesh Murthy
: Dr.KILLEDAR MILIND A
: Dr.Rishikeshi Nikhil

IC45 - Read between the lines: Statistics for General Ophthalmologist

Dr.Shraddha Sureka [M1901/16] - Mumbai

Date	27-Oct-2018
Time	11:00-12:00
Hall	D

Medicine is changing at an unparalleled pace. Present day beliefs are being replaced by tomorrows proof. In this era of evidence based medicine we are faced with increasing challenges of implementing newer techniques, drugs and technologies in our practice. Research articles help us solve these challenges. Research articles are usually influenced by a flawed methodology in various capacities. Having a basic understanding of the statistics and research articles is the key. The course aims to discuss a simplified way of understanding statistics and analyzing a research article. This will help the participant to understand what he or she can implement in his or her practice.

Study Design

How to choose an appropriate test

Sensitivity and specificity

P value and Confidence interval

How To Analyse an Article

: Dr.Lubhani Jain

: Dr.Shraddha Sureka

: Dr.Patil Prajakta

: Dr.Modi Rohit

: Dr.Hoshing Abhishek

IC35 - The unique problem of glaucoma : Underdiagnosis and overtreatment

Dr.Vidya Chelerkar [C22] - Pune

Date	27-Oct-2018
Time	12:00-12:50
Hall	C

Early diagnosis is essential in the management of glaucoma. On the other hand over diagnosis and treatment can affect the quality of life of the patient, cause economic burden , and can have potential side effects. Improper clinical evaluation and over dependence on imaging techniques may lead to overdiagnosis. This instruction course will clear the fundamentals and give tips to avoid overdiagnosis, guidelines on whom to treat , decision making in suspected patients.

To treat or not to Treat - present role of IOP

Clinical assessment of Optic Disc - not to miss early glaucoma and avoid over diagnosis

Perimetry for early detection and progression of Glaucoma

Glaucoma Suspect: Role of OCT

PACG Suspect : How to proceed

: Dr.Tagare Abhijit A

: Dr.Medha Nitin Prabhudesai

: Dr.Nerlikar Roopali

: Dr.Walimbe Tejaswini

: Dr.Vidya Chelerkar

IC53 - Consent Redefined in Clinical Practices

Dr.Agarkhedkar Shalaka S [A6] - Pune

Date	27-Oct-2018
Time	12:00-13:00
Hall	D

Title - Informed Consent in Clinical Practices– Redefined Objectives – •What is Consent? Evolution of Consent, Principles of Consent and Elements of Consent, Administration of the Informed Consent.Ethical and Medicolegal aspects of Informed Consent. Introduction – Informed consent is an integral part & essential component of clinical care and is a key element which has got Ethical, Legal and practical implications. It is a person’s agreement to allow or refuse something to happen based on a full disclosure of risks, benefits, alternatives.True and valid informed consent, fulfill the criteria of Informed, Voluntary and Capacity. Definition, Types & components of Informed Consent Take Home message : • Importance Of good communication and good documentation bet. Clinicians and Patients in relation with informed consent. • The valid refusal • Understand the Ethical and Legal basis of consent • Malpractice suits dangerous for the doctor since the burden of proof lies on the doctor.

Consent redefined

Consent redefined

: Dr.Agarkhedkar Shalaka S

: Dr.Saswade Manoj R

IC39 - Prevention , Early diagnosis and treatment of postoperative Endophthalmitis

Dr.Lahane Sayalee Tatyrao [L1795/14] - Mumbai

Date	27-Oct-2018
Time	12:00-12:50
Hall	E

Endophthalmitis remains one of the most feared complications of intraocular surgery. This instruction course will include how to diagnose postoperative endophthalmitis ,differentiating it from TASS, how to identify delayed postoperative and bleb related endophthalmitis. Investigations including Ultrasound finding , AC tap procedure will be covered. Intravitreal antibiotic injection preparation and method of administration including new forthcoming recommendations in the setting of intravitreal injections. Systemic management including role of steroids and improvements in the realm of new and more effective antimicrobial therapy. Procedure of vitreous biopsy and when to do Surgical interventions, whether recommendations from the Endophthalmitis Vitrectomy Study are still valid and applicable today and recent recommendations. Prevention and prophylaxis against the development of infection. Attention will be focused on new developments in the management of proven infection.

Early Diagnosis of acute post operative endophthalmitis & differentiating TASS

Delayed postoperative endophthalmitis- (Fungal and Propiobacter acnes) & Bleb related

Investigations , Medical Management :AC Tap procedure & Role of steroids

Intravitreal injections: Doses, preparation , administration & systemic antibiotics

When to do Surgical intervention...Vitreous biopsy and vitrectomy

Update on Prevention & Prophylaxis in the setting of cataracts surgery

: Dr.Lahane Sayalee Tatyrao

: Dr.Chinmay Nakhwa

: Dr.Yogesh Patil

: Dr.Sarate Pallavi

: Dr.Sagar Bhuibhar

: Dr.Parekh Mustafa A

IC59 - "Devil lies in the Details" - Improving Phaco outcomes

Dr.Bhosale Seema [B1965/16] - Navimumbai

Date	27-Oct-2018
Time	13:00-13:50
Hall	D

Cataract surgery has evolved leaps and bounds in the past century with everyone adapting to and mastering the art of phacoemulsification. The final frontier in today's era of refractive cataract surgery is understanding and implementing the finer nuances and aspects of Intraocular lens power calculation for the best possible refractive outcome. The purpose of this instruction course is to throw light on understanding the concepts and use of newer corneal parameters like EKR, TNP and PCA beyond keratometry in special situations and Toric IOL power calculation. To understand ELP (effective lens position) and its utilization along with optimization of 'a' constant for each IOL helps in refining the refractive outcome and avoiding refractive surprises. We would also delve upon the roadblocks and difficulties in IOL power calculation in post keratorefractive surgery patients, methods of overcoming them and role of newer IOL formulae in our armamentarium.

Conquering the corneal curves: EKR, TNP, PCA

ELP- being at the right place every time

Change is the only constant - 'a' constant optimization

Hill and Barrett - the new kids on the block

Post Refractive IOL power Calculation : feeling the 'PRIC'

: Dr.Bhosale Seema

: Dr.Sudha Seetharam

: Dr.Hoshing Abhishek

: Dr.Chipade Prakash

: Dr.BHAVE MRUDULA

IC44 - PTERYGIUM SURGERY : UNDERSTANDING CONCEPTS AND EMERGING APPROACHES

Dr.SWAPNIL BHALEKAR [B-1619/13] - SHIRUR

Date	27-Oct-2018
Time	13:00-13:50
Hall	E

The surgical treatment of pterygium has long been a challenge for Ophthalmologists. However, in recent years new approaches for placement of conjunctival autografts using fibrin tissue , autologous blood have dramatically improved cosmetic results for patients and significantly reduced postoperative complications. Still, the main challenge to successful surgical management of pterygium is recurrence evidenced by fibrovascular growth across the limbus onto the cornea . Many surgical techniques have been used though variable recurrence rates have been reported with all techniques. It plans to cover various aspects of pterygium management , new techniques including tenon's preserving pterygium surgery, stem cell treatment , various ways to reduce recurrence and newer advances.

PTERYGIUM EXCISION WITH CONJUNCTIVAL AUTOGRAFT USING AUTOLOGOUS BLOOD

: Dr.AJAY KULKARNI

SIMPLE LIMBAL EPITHELIAL TRANSPLANTATION (SLET) IN PTERYGIUM

: Dr.Alok Sati

TIPS AND TRICKS OF PREVENTING RECURRENCES IN PTERYGIUM

: Dr.SWAPNIL BHALEKAR

P.E.R.F.E.C.T. TECHNIQUE FOR MANAGEMENT OF RECURRENT PTERYGIUM

: Dr.SWAPNIL BHALEKAR

IC62 - Managing Phaco Complications in Rock Hard Cataracts.

Prof.Keiki R. Mehta [M23] - Mumbai

Date	27-Oct-2018
Time	14:00-14:50
Hall	A

Course will comprehensively discuss and demonstrate the techniques to manage complications which ensue when a rock hard cataract is done. Strategies in evaluating and saving the endothelium by managing ultrasound settings. Retrieving a difficult rhexis, splitting a reluctant lens, managing a surgically induced zonular dehiscence, and a split capsule half way through procedure. Using capsular stabilization devices and finally saving a sinking lens, and managing subsequent suturing of the IOL. Course Objectives: This course aims to equip the attendee with the ability to assess a hard cataract, judge how to split a sticky had lens, assess the capsular support , predict the problems which will occur, take preventive steps and effectively manage complications they arise at any stage of the procedure.

Overview of the course topics. Advanced Surgical Techniques to Prevent Complications in Phaco

Hard cataracts with Optimizing viscoelastic devices.

Managing Difficult Cataracts using New Novel Techniques

Stabilizing a Sinking Lens

Newer methods on splitting elastic and difficult lenses

Optimization - The key to managing rocks.

When in trouble, what to do?

: Prof.Keiki R. Mehta

: Dr.Lahane Tatyrao P

: Dr.Vardhaman Kankaria

: Dr.Aditya Kelkar

: Dr.Kumar Doctor J

: Dr.Mehta Cyres K

: Dr.Parikh Ragini

IC1 - 'Pearls of Practice, enrich yourself !'

Dr.Prakash Marathe [M16] - Pune

Date	27-Oct-2018
Time	14:00-15:00
Hall	D

While setting an Ophthalmic Practice one has to develop it and reach towards overall growth. By this you will be able to sort out various issues to enrich your practice. This IC has senior experts who have crossed many hurdles and established themselves as successful, ethical practitioners with a responsible philanthropic touch too. The Chief Instructor is a veteran, Past President of various Medical Associations and Ophthalmological Societies. He will be clearing doubts about advertisement in practice. Practice improvement towards premium one, tips to budding Ophthalmologists, making them aware about medicolegal issues, Cost cutting in practice, sharing the equipments, required Certificates in running hospital are the various topics enriching your practice will be covered. The course will help delegates to fulfill their dream of taking their private practice to greater heights, which should be helpful to the self as well as patients and society at large.

Advertisement vs no advertisement in private practice

How to convert a small time practice into a premium one, learn from the masters

How to manage a budding practice?

Laws and medicolegal cases in Ophthalmic practice

Cost cutting, how to achieve in an individual practice ?

Instruments sharing - the efficient way

Certifications required for running a hospital - situation in 2019.

IC51 - Ocular surface disease- approach and surface reconstruction

Dr.Thakur Rasika Ramchandra Ms [T1730/14A] - New Panvel

Date	27-Oct-2018
Time	14:00-14:50
Hall	E

Ocular surface diseases are wide ranging from allergies, chemical burns, thermal burns, and immunological conditions such as Mucous Membrane Pemphigoid and Sjogren's Syndrome, stem cell deficiencies etc. It's challenging to diagnose and manage these conditions. This Instruction Course will cover the pearls & pitfalls about the management of Ocular allergies, Ocular Surface Neoplasms(OSSN) ,new in dry eye disease. It will also have an overview about the treatment modalities for chemical injuries & other causes of limbal stem cell deficiency with discussion on surgical procedures like Amniotic Membrane Transplantation(AMG),Simple Limbal Epithelial Transplants (SLET) & ocular reconstruction surgery.

Limbal Stem cell Deficiency- common clinical scenarios

new in dry eye disease

IC48 - Perimetry- come learn with us.

Dr.Kamdar Priti [K15] - Mumbai

Date	27-Oct-2018
Time	14:00-15:11
Hall	F

Perimetry is absolutely essential to the management of glaucoma. It is the only method we have to assess functional damage in glaucoma, however it is also the most subjective method in our basket. Missing early defects can delay glaucoma diagnosis while mistaking artefacts for glaucomatous defects can lead to a mis-diagnosis of glaucoma condemning the patient to unnecessary mental trauma & lifelong treatment. This course aims to cover salient points of reading visual field printouts, identifying true defects, artefacts , neurological defects mainly through panel discussion & correlation with the clinical picture through real life cases. Another highlight of this perimetry instruction course is, it includes not only humphrey fields but also octopus & non humphrey/non octopus fields which are usually ignored.

Introduction to the course & co instructors

: Dr.Kamdar Priti

What is a strategy & what is a pattern?

: Dr.Kamdar Priti

Tips for reading an humphrey printout

: Dr.Nerlikar Roopali

Tips for reading an octopus printout

: Dr.DHAMANKAR RITA R

How do I read a non humphrey/non octopus printout?

: Dr.Kamdar Priti

How are indian perimeters different?

: Dr.Tagare Abhijit A

IC72 - "WHAT NEW I DID THIS YEAR IN CATARACT SURGERY"

Dr.HALDIPURKAR SUHAS S [H1] - NAVI MUMBAI

Date	27-Oct-2018
Time	15:00-15:50
Hall	A

Cataract surgery” technique has improved by leaps and bounds, keeping the cataract surgeon on the edge of his seat all along. In the process, all of us have evolved as better cataract surgeons for the pure benefit of the patients. In our instruction course we have tried to invite a panel from different practice back ground to learn what they have incorporated in their cataract surgery and how they have evolved as better cataract surgeons in the last one year. It will be a great learning experience watch them share their new skills and their reasoning for the changes

WHAT NEW I DID THIS YEAR IN CATARACT SURGERY

“WHAT NEW I DID THIS YEAR IN CATARACT SURGERY

IC37 - Diabetic Macular Edema Diagnosis & Management Options

Dr.PANGARKAR ANAND V [P14] - Nagpur

Date	27-Oct-2018
Time	15:00-16:00
Hall	D

India is heading towards becoming the Diabetic Capital of the World , and Diabetic Macular edema is the leading cause of Visual loss / Disturbance in Diabetics Therefore it has become Imperative for all Ophthalmologists to be able to detect , diagnose , investigate and treat or recommend treatment. This instruction course intends to cover from Patho Physio to Investigative modalities like Fundus Fluorescein Angiography & OCT , as also the different management options like Drugs , laser & Surgery. The I / C will feature an interactive Session at the end with illustrative Cases for emphasis.

Diabetic Macular Oedema – Path Phyrio / New Concept

Role of O.C.T. & Angio

Intra Vitreal – Anti VEGFS / Ster

Role of Laser

Surgical management

IC56 - Basic Principles of Management of Ophthalmic Trauma and Medicolegal Aspects

Dr.Aditi Parag Watve [W-1451/12] - Kolhapur

Date	27-Oct-2018
Time	15:00-15:50
Hall	E

Management of ophthalmic trauma continues to evolve with the advent of newer techniques and technology with better outcomes. But basic principles of trauma management remain the same. This course aims to provide general ophthalmologists with update on ophthalmic trauma, including medical and surgical management of various ophthalmic subspecialties, as well as the medicolegal aspects while handling a patient with ophthalmic trauma. At the end of the course, delegates will have overall knowledge of basic assessment as well as management of corneal injuries, vitreoretinal trauma, intraocular foreign body, intraocular blunt trauma, ocular adnexal trauma (eyelid, lacrimal and orbit trauma) and medicolegal aspects.

Basics of evaluation of a patient with ophthalmic trauma

Management of corneal trauma

Intraocular blunt trauma

Management of retinal penetrating injuries and IOFB

Management of ocular adnexal trauma

IC43 - Challenges in counselling for retinal Surgery..What NOT to do!

Dr.Subramanyam Anand [S1840/15] - Mumbai

Date	27-Oct-2018
Time	16:00-16:50
Hall	C

Counselling for Retinal surgery has always been a different ball game compared to cataract surgery. Various factors like post operative guarded prognosis, long surgical time, uncertain post operative outcomes makes it an uphill task to deal with the patient sensibilities. Our speakers will be discussing in depth , the various nuances for counselling for retinal surgery, covering points like dealing with patient apprehensions, expectations and the art of tackling tricky situations like assuring an over anxious patient, ethical and medicolegal issues involved, elaborating on the art of postoperative counselling regarding failed surgery, complicated surgery, resurgery etc. Pearls regarding patient selection for surgery and basic preparation before actual surgery will also be discussed. We also will be discussing on how to save your skin when landing up in a medicolegal tangle by an unsatisfied patient, & an ethical way to prevent such untoward incidences

Knowing when NOT to Operate!

Preoperative Counselling for Vitreoretinal surgery, Discussing the Grey areas!

Preparing the patient for Retinal surgery

It Didn't workout! How to disclose news about failed surgery

The Legal Tangle!..Medicolegal aspects of Vitreoretinal surgery

IC12 - Musculoskeletal Disorders in Ophthalmology- The Silent Epidemic

Dr.Mishra Indeevar [M1708/14] - Mumbai

Date	27-Oct-2018
Time	16:00-17:00
Hall	D

Musculoskeletal disorder(MSD) is a recent noncommunicable disease to reach epidemic proportions.MSD is a combination of disorders such as disc bulges/prolapses & neuropathies. MSD causes loss of quality of life index by decreasing the working time by 5 hours/week in mild/moderately affected individuals & cessation of physical activity in severe cases may be needed.Sedentary lifestyle combined with the lack of knowledge of ergonomics has resulted in this disorder affecting 70% of the Indian Ophthalmologists. Post partum women ophthalmologists & high volume surgeons are the worst hit.With the recent surge in the scientifically designed validated studies on MSD, various resources are available at our disposal.We shall be demonstrating properly and in a structured format via a team of Esteemed senior ophthalmologists the methodology as how to deal with the MSD and also the modifications needed to make the working environment “SPINE” friendly in order to avoid it in the future.

MSD - The Untold story, Ophthalmology might be crippling you.

Ergonomics and MSD - Defining the relationship.

The Signs of MSD - The Basic Know how for the Ophthalmologist

MSD in Women Ophthalmologists - The Silent Epidemic

What to do when MSD strikes?

Technical aspects of preventing MSD in the OPD & OT

Learn from the masters - 10 commandments for dealing with MSD

: Dr.Mishra Indeevar

: Dr.Potdar Nayana A

: Dr.Ooney Vaishali L

: Dr.Prakash Marathe

: Dr.Taswala Jignesh

IC9 - Cataract : Optimizing results with co-morbidities and complications

Dr.Datar Sameer G [D56] - Pune

Date	27-Oct-2018
Time	16:00-16:50
Hall	E

Cataract surgery has evolved tremendously over the years. Right from type of surgical procedure, choice of lenses used , to timings and situation, when and where to be done, has to be looked at accordingly. Going ahead technology has its own advantages and set complications as well. Simple wound infiltrate through TASS to endophthalmitis. These need to be looked at and managed timely to preserve the globe integrity and give the best possible functional visual outcome post their management. This instruction course carefully draws attention to all aspects and discusses all in detail and a scientific methodical manner.

Importance of lid hygiene and pre-operative investigations

Precautions in hard cataract

Choice of Intra Ocular Lens

Cataract in uveitis cases

Cataract in compromised cornea situations

Wound Infiltrate : its management

Cataract in diabetic retinopathy and retinal problems

Endophthalmitis : Nightmare to be dealt with.

IC47 - IOL implantation in absence of intact posterior capsule – Video assisted skill transfer course

Dr.Yogesh C Shah [S131] - Mumbai

Date	28-Oct-2018
Time	08:00-08:50
Hall	A

Absence of posterior capsular support can occur after complicated cataract surgery, trauma, surgeries requiring lensectomy, etc. Aphakic glasses and contact lenses may prove to be a major hindrance to lifestyle in the present era. In this VAST course various options to implant IOL such as sutured scleral fixated (SF) IOL, Glued IOL, Glueless IOL, Iris fixated IOL will be discussed. Highlight will be video demonstration of the procedures and step by step instructions for beginners

The Traditional way: Sutured SFIOL

Glued IOL

Lets get Rid of Sutures and Glue: Sutureless SFIOL

SFIOL in challenging Situations

Sutured VS sutureless: The Great Debate

IC83 - THE SURGEONS FILES- TO DO.. UNDO ..OR REDO

Dr.Mulay Aishwarya [M 2187/18] - Pune

Date	28-Oct-2018
Time	08:00-09:00
Hall	D

While surgery is an art and its execution a science.. We may occasionally encounter case scenarios where surgical interventions end up with below par results or unsatisfactory outcomes , or sometimes just an unanticipated end result.. Either early or late.. In the post op period. The decision then rests squarely on our shoulders as to how to re intervene in the most appropriate manner to set things right. This act calls upon evaluating the situation with clinical examinations and specialised tests, and often times a revisit to the operation theatre.. This IC focuses on those patient files that has given us a heart burn.. Made us rack our brains... And redress the discrepancy.. These surgeon files will be opened out in front of you by senior experienced ophthalmologists and the learning and experience shared..

add on iol, iol exchange for dysphotopsia, iol explant techniques,toric iol realignment
retained nucleus, capsular block
Descement strip, pseudophakic pupillary block,wound burn
inadverent bleb, post-op vitreous disturbance
retained cortex, ac wash

IC57 - "Myopia" Minutiae

Dr.Sudha Seetharam [S 2160 /18] - Navi Mumbai

Date	28-Oct-2018
Time	08:00-08:50
Hall	E

Myopia has a major social, cultural, economic and aesthetic impact. It also throws a major clinical challenge starting from early diagnosis and prevention of progression to offering cosmetically pleasing treatment options. In this instruction course the audience will be walked through a life journey of Myopia starting from its early detection and prevention of progression. This will be followed by a discourse of Contact lens use as a cure, with a focus on the Adolescence age group. The delegates will then learn about the advances in Cornea based laser refractive surgeries. This will then be complemented by a session on Lens based treatments on Myopia. Finally the session will be rounded off by a carefully crafted talk on all retinal aspects of Myopia.

Catch'em Young: Early detection and treatment of Pediatric Myopia

Contact Lenses : A healing 'Touch'

Carving a Cure : Cornea based Laser Refractive Procedures

Intraocular Implants - Innovations and Inspirations

Risk and Remedies for the Rear : Retinal aspects of Myopia

: Dr.Ambardekar Prachi P

: Dr.Sudha Seetharam

: Dr.Hoshing Abhishek

: Dr.VIJAY SHETTY

: Dr.Devendra Phalak

IC71 - My Most Challenging Case This Year

Dr.Kumar Doctor J [D62] - Mumbai

Date	28-Oct-2018
Time	09:00-09:50
Hall	A

Course is an Advanced Instruction Course where the most difficult and rare case encountered in the last year will be shown. Course deals with challenging situations like management of zonular dialysis in a case of subluxated lens, stuck CTR what to do next etc. Multiple situations encountered post trauma like traumatic cataract, magic of glue in a case of dangling IOL with pre existing PCR, various suturing techniques in a case of iridodialysis and bag stabilization with traumatic cataract and placement of valve are discussed. A rare case of microcornea with microphthalmus and traumatic cataract will be shown. The panel will discuss how to deal challenges with understanding technology for better outcomes visually for better patient care.

microcornea with micro ophthalmus and traumatic cataract

Challenges in subluxated hard cataract with small pupil

Post traumatic cataract with iris repair

Glue magic in dangling IOL , Traumatic Cataract management

Stuck CTR

Retro capsular Nucleus

IC40 - Reading the mind of a Ace Surgeon

Dr.Khare Bhushan [K-1601/13] - Pune

Date	28-Oct-2018
Time	09:00-09:50
Hall	B

Ophthalmic surgery is a complex interplay between man & machine. How is an ophthalmic surgeon 'born'? How is the evolution of an ordinary surgeon to a person with mastery over his/her craft made possible? In this IC we will have interview & interaction with top notch ophthalmic surgeons & learn from them, their psychological process, learning tools, and in general, their attitude which helped them in becoming an ace of their craft. The ic shall be divided in 5 segments of 10 minutes each 1. Early days: Experience during training 2. Specialisation: Learning special skills during fellowship 3. Picking up new techniques & skills during practice:being a thoughtful surgeon 4. Mind & body connection: physical attributes, attitudes and dealing with complications, a psychoanalysis 5. Useful tips to master art & science of Ophthalmic surgery.

'READING THE MIND OF AN ACE SURGEON'. We would like you to be one of the esteemed panelist.

IC36 - No fear, we are here: Management of posterior segment complications of anterior segment surgery

Date	28-Oct-2018
Time	09:00-09:50
Hall	C

Dr.Bansal Piyush [B132] - Pune

Advancements in surgical equipment and increased surgical skill herewith have brought a revolution in the management of mishaps and what were previously devastating complications of anterior segment surgery. Complications of anterior segment surgery like nucleus drop, giant retinal tear, aphakia, cystoid macular edema, endophthalmitis, choroidal detachment, globe perforation and posterior capsular rent can now be effectively managed with the right surgical tools and skills. This will be a video assisted instruction course highlighting the management of these complications to achieve a good outcome. At the end of the course, the audience will have several surgical and management pearls from experts and will be better prepared to tackle the management of these difficult yet salvageable situations.

Unexplained vision loss after cataract surgery

Nucleus drop: Deep diving strategies

Managing a nightmare: Endophthalmitis

All is not lost: Posterior capsular rent management

Rhegmatogenous retinal detachment after cataract surgery

: Dr.BAWANKULE PRASHANT K

: Dr.Sonawane Suhas

: Dr.Khatri Manoj Subhash

: Dr.Bansal Piyush

IC21 - Pediatric Ophthalmology POTPOURRI For Comprehensive Ophthalmologist.

Date	28-Oct-2018
Time	09:00-10:00
Hall	D

Dr.Prasad Walimbe [W5] - PUNE

This instruction course on pediatric ophthalmology covers a plethora of topics encompassing the gamut of pediatric ophthalmology spectrum. Starting with a video wonderland of pediatric cataract management, it then continues with didactics coupled with highly informative video clips by eminent speakers in the respective fields on a number of pediatric ophthalmology conditions including congenital glaucoma ,pediatric oculoplasty , squint in children, pearls in pediatric refraction & pediatric retinal disorders. The course will give a bird's eye view and useful take home messages for comprehensive ophthalmologists, postgraduate residents and superspecialists alike !

Pediatric Cataract Management

Congenital Glaucoma

Pediatric Oculoplasty

Pediatric Squint Overview

Pearls In Pediatric Refraction

Pediatric Retinal Disorders

: Dr.Prasad Walimbe

: Dr.KILLEDAR MILIND A

: Dr.Ramesh Murthy

: Dr.Dhamankar Tanmayi

: Dr.Kanade Abha V

: Dr.Medha Nitin Prabhudesai

IC67 - Endothelial Keratoplasty- All you need to know

Dr.Kavita [R2181/18] - Mumbai

Date	28-Oct-2018
Time	09:00-09:50
Hall	E

Endothelial keratoplasty an overview Endothelial keratoplasty has seen significant advances in the last decade. It started with DSEK moving to DSAEK and finally DMEK. This course covers all aspects of endothelial keratoplasty. It covers special situations in which DSEK can be done with good results like with SFIOL, triple surgery, pediatric DSEK. It covers tips for beginners to transition from DSEK to DMEK and eventually ends with tips to improve results in DMEK.

Endothelial Keratoplasty: an overview

DSEK in special situations

Automated DSEK

Managing Complications of DSEK

Transitioning from DSEK to DMEK

: Dr.Kavita

: Dr.Shah Sushmita G

: Dr.Maskati Quresh B

: Dr.Gokhale Nikhil S

: Dr.Kavita

IC10 - What is the best buy for my practice: Choosing optical biometer and phacoemulsification system

Date	28-Oct-2018
Time	10:00-10:50
Hall	C

Dr.Paranjpe Mandar [P81] - Pune

Choosing the best equipment for our practice can be a challenge, given the limited resources, a wide array of machines available, maintenance cost, etc. This IC will focus on two machines which are an absolute must for any anterior segment surgeon. Optical biometer & phacoemulsification system. The IC intends to give useful tips from an experienced panel of ophthalmologist, about how they select an appropriate machine, best suited for their practice.

Lenstar Optical Biometer
Alladin Biometer
Swept Source Optical Biometer
Oertli Phacoemulsification
Centurion Phacoemulsification
Soverign Phacoemulsification

: Dr.Paranjpe Mandar
: Dr.Khare Bhushan
: Dr.Pahuja Kishore
: Dr.HALDIPURKAR SUHAS S
: Dr.Hazari Ajit
: Dr.Ladi Jeevan S

IC65 - Vision Assessment and Prescription of Glasses in Children

Dr.Kirpekar Tejaswini [K1945/16] - Pune

Date	28-Oct-2018
Time	10:00-11:00
Hall	D

A child's vision – the most priceless of the five senses , is taken so much for granted, even without fathoming the huge relevance of this faculty. A child's vision plays an irreplaceable role in all the aspects of the child's development in a holistic manner. The least we, as eye specialists, can do is to ensure that the visual acuity of a child does not get marred by the most commonly devastating, yet totally preventable cause of visual impairment in children, that is , refractive error. Vision development in children is a dynamic process and major difficulty in assessment lies due to inability to examine them with routine tests. Also, the normal range of vision in children is less than that in adults. . This instruction course is very basic in nature yet very relevant as it aims at understanding the normal growth and development of vision in children and when to and when not to prescribe glasses at different ages.

An Overview

Vision estimation in children according to age

Journey of Emmetropization - Normal refractive error shift pattern

When to and when not to prescribe glasses - Prescribing criteria in routine refractive errors

Prescribing glasses in special conditions – Post- cataract surgery, Strabismus, Subluxated lens,

IC79 - Orbit- The Real Pandora's Box!

Dr.Sonal S Chaugule [C1316/11/A] - Pune

Date	28-Oct-2018
Time	10:00-10:50
Hall	E

Orbit has always been referred to as the 'Pandora's Box'. The orbital diseases though rare, form a group of interesting as well as challenging cases we see in general as well as oculoplasty practices. Orbit could be involved primarily or secondarily from a pathology originating from the intracranial space or paranasal sinuses. Identification of the 'tell-tale signs', diagnosis and prompt management of orbital diseases is of utmost importance and is sometimes life-saving. This course will focus on clinical evaluation of a case of proptosis, decoding through the various differential diagnosis, the role of neuroimaging in orbital pathologies, surgical approaches to orbit and role of multimodal management in case of orbital diseases. The course would include interesting case based discussions and interactive sessions.

Clinical evaluation in a case of Proptosis

Coming to a diagnosis!

Role of Neuroimaging in orbital diseases

Surgical approaches to orbit

Recent advances and role of multimodal management in orbital diseases

: Dr.Lahane Sumeet Tatyrao

: Dr.Aditi Parag Watve

: Dr.Deshpande Rahul D

: Dr.Dhobekar Mangesh

: Dr.Sonal S Chaugule

IC5 - 'Proliferative Diabetic Retinopathy – What to do and When...'

Dr.Samant Preetam [S137] - Mumbai

Date	28-Oct-2018
Time	11:00-11:50
Hall	C

1. Clinical characteristics and Consequences of Proliferative Diabetic Retinopathy (PDR) 2. LASER Protocols for PDR: Simplified 3. Intravitreal pharmacotherapy - Anti-VEGFs alone or as adjunctive treatments in management of complications of PDR 4. Principles of diabetic vitrectomy – When and How? 5. Complications of Diabetic vitrectomy and dealing with repeated bleeds 6. Challenging cases with Questions and answers and Panel Discussion

Clinical characteristics and Consequences of Proliferative Diabetic Retinopathy (PDR)

: Dr.Kabra Sachin B

LASER Protocols for PDR: Simplified

: Dr.Sawant Swapnesh Deepak

Intravitreal pharmacotherapy - Anti-VEGFs alone or as adjunctive treatments in management of complic

: Dr.Shikari Hasanain T

: Dr.Loya Jagdish R

Complications of Diabetic vitrectomy and dealing with repeated bleeds

: Dr.Bapaye Maneesh

Challenging cases with Questions and answers and Panel Discussion

: Dr.Samant Preetam

IC78 - A Practical Approach to Vision Disorders in Children

Dr.Thakre Snehal R [T16] - Aurangabad

Date	28-Oct-2018
Time	11:00-12:00
Hall	D

This course is clinically oriented and stresses on the approach to a child with vision disorders. It aims to tackle the evaluation of vision in children, causes of the vision disorders well as management of the common causes. The topics are as follows - 1. Can this Child See? 2. Why Can't this Child See? 3. Refractive Errors - When and How to Correct Them. 4. Cortical Visual Impairment - What is this? 5. Amblyopia Management Strategies - Old and New.

Can this Child See?

: Dr.Kirpekar Tejaswini

Why can't this Child See?

: Dr.Thakre Snehal R

Refractive errors - When and How to correct

: Dr.Bhate Manjushree

Cortical Visual Impairment - What is this?

: Dr.Rishikeshi Nikhil

Amblyopia Management strategies - Old and New

: Dr.Malik Sunaina

IC46 - Role of AntiVEGFs: Demystified

Dr.Gaurav Y Shah [S132] - Mumbai

Date	28-Oct-2018
Time	11:00-11:50
Hall	E

AntiVEGFs have revolutionized management of retinal disorders. They are extensively used for treatment of Wet ARMD, vein occlusions and diabetic macular edema. But there still exist certain dilemma with regards to which antivegf is the best, what is the best treatment protocol and for how long should we inject. Apart from the above dilemmas, it's not reimbursed by quite a few insurance companies. The instruction course simplifies the above challenges and dilemmas.

OCT: in 4 easy steps

Diabetic Macular Edema: Antivegfs vs steroids vs lasers

Wet ARMD: Are 3 monthly injections enough?

Retinal Vein occlusions: when to inject and Reinject

how to make insurance companies pay for AntiVEGF therapy?

Cost vs Efficacy vs Safety: My choice of AntiVEGF

IC64 - Tips & tricks in Toric IOL practice.

Dr.HEROOR ANAGHA A [H5] - THANE

Date	28-Oct-2018
Time	12:00-12:50
Hall	B

Cataract surgery is the most common refractive procedure done today. Residual Astigmatism remains the commonest hurdle in the quest to achieve 6/6 unaided vision in cataract surgery patients. We present this Instruction course with a view to explaining the nuances of managing astigmatism in cataract surgery with toric IOLs, the use of technology to improve accuracy , & dealing with special situations like Post RK & keratoconus & astigmatism management in multifocal iols. We would also touch upon management of failed toric iols, posterior corneal astigmatism & newer toric calculators.

Posterior corneal astigmatism & new toric calculators

Workup & Surgical technique : Dr Anagha Heroor

Use of Markerless systems in toric IOL

Management of failed toric IOL

: Dr.Ladi Jeevan S

: Dr.HEROOR ANAGHA A

: Dr.Kumar Doctor J

: Dr.Nagvekar Sandeep S

IC82 - A to Z of Refractive Surgery

Dr.Vardhaman Kankaria [K1130/08] - Pune

Date	28-Oct-2018
Time	12:00-12:50
Hall	C

Refractive Surgery is at forefront of many exciting new developments. This course discusses from patients selection, imaging, LASIK, Surface ablation, FemtoLASIK, SMILE, Phakic IOL in systematic manner. It will be video based and interactive session by leading national faculty in refractive surgery.

How I choose patients and ideal procedures

LASIK and FemtoLASIK

Surface Ablation - Role Today!

Relex SMILE - The latest advancement

Phakic IOL

Final words

: Dr.Kumar Doctor J

: Prof.Keiki R. Mehta

: Dr.Darak Ambarish Balkrishna

: Dr.Vardhaman Kankaria

: Dr.Kavita

: Dr.KANKARIA PRAKASH K

IC33 - THE VITREORETINAL INTERFACE : Pathology, Imaging and Surgical management

Dr.Devendra Phalak [P2027/17] - panvel

Date	28-Oct-2018
Time	12:00-12:50
Hall	D

This course gives an overview over the physiology of the vitreoretinal interface and its pathophysiological role in the pathogenesis of various conditions such as macular hole, epimacular membranes, macular pseudoholes and vitreomacular traction. We will discuss these disease entities with regard to various diagnostic imaging modalities and surgical management (including video) of all these entities

classification and imaging of VR interface disorders

epimacular membrane

macular hole

vitreomacular traction

: Dr.Asif

: Dr.Devendra Phalak

: Dr.Devendra Venkatramani

: Dr.tyagi mudit

IC60 - CATARACT SURGERY IN DIFFICULT SITUATION

Dr.VIJAY SHETTY [S172] - MUMBAI

Date	28-Oct-2018
Time	12:50-13:45
Hall	D

Evolving technology and newer techniques over the years has helped us to understand the art of phacoemulsification. This has helped us all sail through all routine cataract surgeries but successful outcome in difficult situations is still an enigma for many. Phacoemulsification in difficult situations is a challenging task, even in the hands of experienced surgeons and the purpose of this Instruction course is to highlight important decision making pointers, provide tips, finer nuances and techniques that would help each one of us to undertake these difficult cataract surgeries and lead them to a successful outcome. We would be discussing these difficult cataract scenarios in a video assisted manner for Cataracts in Compromised Corneas, Non dilating / poorly dilating pupils, Hard cataracts, weak zonules and IOL implantation in eyes with absent capsular support. As the proverb goes..“ When the going gets tough, the Tough get going “

Management of small pupil

cataract surgery in hard cataract and compromised cornea

Role of FLACS in non routine cases

cataract surgery in eyes with compromised zonules

IOL implantation in the absence of capsular support

: Dr.Chipade Prakash

: Dr.SATYA MURTY

: Dr.SIDDHARTH VINOD MEHTA

: Dr.HALDIPURKAR SUHAS S

: Dr.VIJAY SHETTY

IC52 - Refractive dilemmas in high ametropia- a case based discussion

Date	28-Oct-2018
Time	13:00-13:50
Hall	C

Dr.Bhagali Ridhima [B140] - Pune

High refractive errors, they maybe myopia, hypermetropia or astigmatism, often pose a challenge to the refractive surgeon. Can one proceed with just a corneal laser refractive procedure or is it necessary to combine it with corneal collagen cross-linking? When does one opt for an ICL or refractive lens surgery instead? What are the results with piggyback and sulcoflex implants? In the presbyopic agegroup, does a multifocal implant supersede all else? What procedure is safer when the patient has a coexisting glaucoma or retinal disease? We aim to answer all these questions in an interesting, case-based, panel discussion. We would discuss the choice of procedure with its pros and cons relevant to the patient's age-group, lifestyle, ocular aberrations and co-morbidities. Audience questions and participation will be encouraged.

Corneal refractive procedures

Phakic IOLs

Lens based surgery and IOL options

Case scenarios

: **Dr.Pahuja Natasha Kishore**

: **Dr.Bhagali Ridhima**

: **Dr.PARYANI MUKESH J**

: **Dr.Srivatsa Purnima R**

IC17 - Understanding Medico-legal Implications in Ophthalmic practice – Way to hassle free Practice

Dr.Shah Viral [S-1498/13] - Nagpur

Date	28-Oct-2018
Time	13:00-13:50
Hall	E

With growing awareness amongst patients about consumer rights and advances in ophthalmic procedures, medico legal negligence cases against eye surgeons are on rise. On every step we need to protect ourselves. Counseling, Informed consent and Record keeping of the surgical procedure have become of utmost important. In our day-to-day busy practice we may not be able to look after all these things properly. The course will touch upon this most important aspects of ophthalmic practice. (HAND-OUTS OF STANDARD CONSENT FORMATS WILL ALSO BE GIVEN TO PARTICIPANTS).

Introduction to course- Turbulent times for Ophthalmic practice

Consumer protection act : A two-edged sword

Counseling before procedure- Well Begun is half the work done

Informed Consent before ophthalmic procedures- Sealing the deal

5. Medico legal implications of cataract surgery-Avoiding Pitfalls

Record keeping- Meticulousness is your savior

Received a Medico-legal notice – Don't press the panic button
